

- WOOD JOINING POST holds plates together
- ⊠ 8"x8" STAIR BLOCK supports metal runners on stairs
- METAL POST numbered and lettered for location - some require shims for level
- ┆ "C" CLAMP holds plates together where there are no Joining Posts

ALL PLATES LABELED:
 DS = DOWNSTAGE (edge toward seats)
 SR = STAGE RIGHT (right side facing AWAY from organ)
 SL = STAGE LEFT (left side facing AWAY from organ)

Use blue-handled tool to rotate built-in joining clamps in plate edges

ASSEMBLY:
 Lay down plywood sheets #1-6 in any order.
 For each subsequent row,
 start in the middle and work out to the sides.
