How to Use the Template

Each date is in a square 1.1 inch cell. It includes the following elements: a date number and two lines of placeholder text.

In the template, the square has no line fill so it is invisible. However, the square is still there to help with placing assets.

When making the calendar, delete unused elements (numbers and placeholder text).

The following is an alternate cell for squares with two dates:

The following assets can be placed over the square cells to signify various events:

Drag the assets and center them over the square cell for consistent layout. Stretch and resize the asset to cover multiple dates.

Remember to always send the asset to the back so the text underneath will show.
