Nesting (Flip-seat)

Castors

Chrome frame

Other options available:

Glides (feet rather than castors)

Upholstered back

Variety of colours

Folding tablet arm

* not available with height adjust

Currently installed in: OISE

Applications:

Areas where the following is required:

- upgraded finish/comfort over standard poly/poly classroom seat
- classroom-grade durability
- wheeled for reconfiguration
- nesting for storage / reconfiguration

The Torsion-on-the-Go seat has been installed in many classrooms in OISE - an environment that sees extremely high usage and constant re-arranging of classroom setup. The foundation fabric, while limited in colour range, is the clear choice because of its outstanding 1-million double-rub tested durability. The seat is comfortable, professional and versatile; an ideal upgraded classroom seat. The back flexes for comfort and for longer range durability; the nesting is superior to stacking in terms of speed and ease in storage and retrieval.

The Torsion seat is wider (24") than a stock 'Perry' classroom seat, so a minimum station width of 30" per seat is strongly recommended.
